Angus Blomley

React / React Native Developer

Sagamihara, Japan • ablomley01@gmail.com

angusblomley.com • LinkedIn • GitHub

Full stack developer with 2+ years of experience building React and React Native applications. Proven track record delivering production mobile apps and browser extensions. Currently based in Japan, available for remote work and open to relocation to London, Dublin, or Belfast from September 2026.

SKILLS

Mobile: React Native, Expo, Mobile App Architecture, iOS/Android deployment
Frontend: React, Next.js, TypeScript, JavaScript (ES6+), Tailwind CSS
Backend: Node.js, Express.js, RESTful APIs, MongoDB, Supabase, Google Cloud APIs
Languages: English (Native), Japanese (JLPT N4 in progress)

WORK EXPERIENCE

Full Stack Developer   Jan 2026 – Present
Vocabo Vocabulary Builder • vocabo.io • London, UK (Remote)

• Maintaining and updating Next.js marketing website with 200+ indexed pages for targeted SEO
• Implemented PostHog analytics to track user interactions and generate insights for product decisions
• Ongoing maintenance and bug fixes for Chrome extension

React Native Engineer   Jan 2025 – Jan 2026
PWG (Performance Window Group) • UK's leading timber window supplier • Mobile app for 40+ field engineers • Remote

• Built and maintained scalable React Native mobile application improving field engineer site-visit efficiency and data management
• Developed complex multi-page forms with state management, validation, and error handling for field data capture
• Led Expo SDK migration (52 to 54), resolving breaking changes and ensuring continued platform support
• Integrated real-time calendar synchronisation and dynamic forms using RESTful APIs

Full Stack Developer   Apr 2024 – Jan 2025
Vocabo Vocabulary Builder • vocabo.io • Chrome Web Store (100+ users, 4.9★) • London, UK (Remote)

• Developed and deployed a Chromium browser extension using React, TypeScript, and Vite
• Architected monorepo using pnpm Workspaces and Turborepo, managing content scripts, background workers, and API integrations
• Implemented DOM mutation observation with adaptive debouncing for efficient text processing on dynamic content
• Built Express.js backend on Google App Engine handling 10,000+ monthly requests for translation and Text-to-Speech

Front-End Developer (Freelance)   Feb 2024 – Apr 2024
Open Fern Studio • London, UK • Completed alongside final year of university

• Created responsive, SEO-optimised business website with modern UI practices and animations
• Implemented form handling with email integrations and optimised performance

Career Break – Self-Directed Learning   Mar 2020 – Sep 2021
• Dedicated time to studying and improving coding knowledge through online courses and personal projects
